PROGRAM ACTIVITIES

Triple Play, Boys & Girls Club's comprehensive health and wellness initiative, strives to improve the overall health of members, by increasing their daily physical activity, teaching them good nutrition and helping them develop healthy relationships.

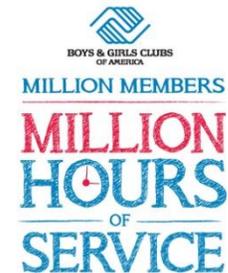

In the Summer Brain Gain program, members are introduced to engaging activities to support the development of critical 21st Century skills. Youth are engaged in a process of learning through discovery, creative expression and collaborative group work that evolves into a final project or production.

DIY STEM is a hands-on, activity-based STEM curriculum which connects youth to science themes they encounter regularly. Special attention is paid to connections of

theory and application and the common interactions members have with these scientific principles.

Million Members, Million Hours of Service (MMMHS) encourages good character and appreciation for citizenship and provides every Club member with opportunities to serve in community based volunteer service experiences.
